

Parts & Accessories

All of our trailers are manufactured on site and we choose to use high quality components sourced from established manufacturers.

We have a full range of parts and accessories which are generally in-stock and available for purchase direct from us, please contact us for prices and availability.

Hitches / Couplings

Jockey Wheels & Stands

Lights

Mud Guards

Wheels & Tyres

We also stock Winches, Compensators, Bungs, Door Supports, Clamps, Cables and Springs

Service & Repairs

Although we are confident our trailers are incredibly hard wearing and durable we recommend annual service.

During the service of a trailer our engineers inspect, Light Fittings, Tyres & Wheels, Bulbs, Brake Cables, Welds & Joints, Wheel & Axle Alignment, Hitch Wear & tear, Ramps and Doors.

We can also carry out repairs to damaged trailers and can add additional components if required at a later date.

Past, Present and Future

The organisation was established in 1990 as High Peak Trailers. In 2007 The Heritage Group purchased the successful business and re-branded the company Heritage Trailers. Since then Heritage have worked with the existing team to try and further improve processes and facilities.

Heritage is committed to the constant enhancement of its products and services with investments in facilities and equipment planned for the upcoming year.

We have a small team of full-time on-site engineers who precisely create our renowned trailers.

We also work with retailers throughout the UK to assist us in the sales and marketing of our trailers.

Heritage Trailers are specialists in the manufacture of trailers in all styles and sizes.

Our trailers are built to the highest specifications designed and built by our experienced and highly skilled team in our factory in Glossop, Derbyshire.

Every trailer from our factory is manufactured from the finest galvanised metal which is welded at join to ensure strength, durability and longevity of life.

Add to this our commitment to use the most advanced mechanisms and hard-wearing components; you will have a trailer beyond any other.

The Heritage team pride themselves on designing and building hard wearing, high quality trailers. All of our trailers are designed and built in the UK by our specialist team of experienced engineers. We use only the finest components (see below) to ensure longevity of use. Whilst creating a range of trailers from established frameworks we are also able to meet specific demands by creating 'made-to-order' trailers.

The Components We Use

Bucket Rest

Detachable cable at both ends

Encased Lights

Additional lighting for increased safety

Extra secure locking and fixtures

High quality Bradley™ hitch

Reinforced ramp

Spare wheel mounted in a convenient area

Spring loading door

Multi Purpose Trailers

This is the lightest of all our range, the Multi-Purpose is both robust and versatile. The light-weight trailer can be towed by almost any vehicle and is able to carry up to 750kg (incl. trailer weight).

Body Sizes: from 6 x 4 to 8 x 5 (Internal: from 1.83M x 1.22M to 2.49M x 1.22M)
Optional Extras: Full Aluminium Ramp, Full Mesh Kit and Spare Wheel.

General Purpose Trailers

The General Purpose is our tough hard-wearing general-use trailer. It is typically used by industry to carry heavier loads up to 2600kg (including trailer weight).

Body Sizes: from 6 x 4 to 10 x 6 (Internal: from 1.83M x 1.22M to 3M x 1.83M)
Gross Weight: from 1300kg Single Axle to 2600kg Twin Axle.

Flat Bed Trailers

The flat bed is capable of carrying up to 3500kg (incl. trailer weight). It has removable sides which facilitate forklift access. We can also provide bespoke ramps for equipment and vehicles.

Body Sizes: from 10 x 6 to 16 x 6,6 (3500 KG) and 8 x 5 to 16 x 6,6 (2600 KG)
A range of extras available. **Also available as tri-axle.**

Plant Trailers

The Plant Trailer is generally used for the transportation of machinery and small plant equipment.

It is a heavier duty trailer capable of carrying up to 3500kg (incl. trailer weight).

HE 2600 KG - Axles: 2 x 1300 (Internal Dimensions 8 x 4)
HE 3500 KG - Axles: 2 x 1800 (Internal Dimensions 10 x 6)

Beaver Tail Trailers

The Beaver Tail trailer is generally used for the transportation of vehicles. The trailer is capable of carrying weights up to 3500kg (incl. trailer weight).

Body Sizes: 14 x 6, 16 x 6, 14 x 6,6 and 16 x 6,6 (All Twin Axles)
Gross Weight: 2600 KG / 3500 KG
Also available as tri-axle.

Specials / Bespoke / Made to Order Trailers

Whilst Heritage offers a standard range of superbly constructed trailers, we also have the flexibility to create bespoke trailers or "specials". We will listen to your requirements, work to your specifications and create the trailer that meets your needs.
